

8000 SPRINGER FLOWER – suitable FOR ALL (also disabled in wheelchair)

Age of use: 0-12 anni

Length: 71,30 cm

Width: 49,00 cm

Height: 90,70 cm

Weight: 55 kg

Game studied to supplement the motor disabled to people of the same age. It's a game fit to hold all the children letting exceed the barriers; The stylised drawing represents the child on wheelchair together with the child of the same age; compared to other games assigned exclusively to the disabled it does not need particular attentions or companions' presence and can be inserted into a park also without particular overseeing.

Spring game made of dyed polyethylene PE-HD, high density and recyclable 100% .

Accessories such as knobs for hands and feet, also made of polyethylene PE-HD guarantee, due to their non-slip surface, a secure fit.

Polyethylene is dealt against UV and presents solidity to the light on wool scale 1 to 8, with value 8.

Spring (21 mm wire) is tested and certified and is anchored to the extremities through the SPRING DISK system.

The U stirrup patented in nylon coloured in mass and 8 mm thick fixed to the spring-disk, guarantees the perfect union and handling between spring group and the shape of the game.

The support of fixing to land is given by a robust frame in steel subsequently zincified to heat as a guarantee of a strong resistance against the corrosion, digged in and fixed to the spring-disk guarantees the anchorage of the whole game to the ground.

The hardware used for the assembly of the spring game is in inoxidizable and zined steel.

SPARES: all the components of the game are available as spare parts. Possible damaged components must be substituted only with original parts of replacement.

INSTALLATION: keep to the illustration attached to the game.

MAINTENANCE: There is advised to carry out controls of maintenance as provided at the EN 1176-7.

CERTIFICATION: The spring game has been planned, realized and certificated following the Standard EN1176-1,6: 2008 and certificate by the Italian Institute Certainty Toy.
