

300L Slide with wooden stair

Certified according to European Standard EN 1176. Realized in painted aluminum 3mm thick. Realized with northern trilamellar pine wood impregnated in autoclave with non-toxic salts. The whole structure is constituted by poles of sec. cm. 9 x 9 with rounded corners to ensure the maximum security. Stair manufactured with elements of climb (steps) in pine wood, with lateral sides in polyethylene. The depth of the step (14 cm) guarantees a wide base of indispensable support for children, lateral protections realized with rounded sticks in polyethylene. Polyethylene avoids that the parts of the staircase (handrail and sides) have dangerous splinters. Polyethylene slide manufactured from 6 mm thick rotationally moulded high density, UV Stable and with a characteristic final wave.

Age of use: 3-12

Decks height: cm 140

Game dimensions: cm 407x88

● **Minimum space required:** cm 757x389

● **Safety floor required:** mq 28,00
