

5001 PUMP FOUNTAIN

Sleeve lenght : 40,00 cm

Tap lenght: 14,00 cm

Height: 87,00 cm

Strong fountain that simulates the system of the historical fountains. The child can pump fresh water directly laced to the drinkable water.

The flow of water independently arrests after 200 ml independently of the position of the handle. Pressure recommended by 1 to 6 bar.

If the pressure is greater it's necessary to use our water pressure reduction valve (optional).

If the tubes of the water are old it is recommended to insert our optional.

MAINTENANCE: There is advised to carry out controls of maintenance as provided at the EN 1176-7.

CERTIFICATION: The spring game has been planned, realized and certificated according to European Standard EN1176:2008.
