

6000A FITNESS TRAIL 16 STEPS IN ALUMINIUM

Gymnastic trail realized in aluminium section 90 x 90 mm thickness 3 mm with rounded corners and finishings for outsides. Guarantee on the parts in aluminium 21 years. All the horizontal bars are in zinced steel and painted of diameter 30 x 2 mm. The horizontal beams and the poles that support the cartels are in zinced steel and painted thickness 2 mm and section 60x30 mm. The trail is divided into 16 steps, 8 of them with tools. The cartels printed on aluminium, have indications according to the degree of preparation of the users. This subdivision allows the amusement and the utilisation from people also not trained or a training for sportings. Each cartel, dimensions 200x400 mm, includes the explanation of the exercise (with an easily understandable image and especially that allows the use to people of any country), the number (following progressively the course, all the muscles of the body manage to be trained in gradual way) and the advice for sporting or not (all the times it is advised to repeat the exercise). Furthermore it's possible to insert short writings and personalised logos.

A "personalised" initial board let better explain the fitness course and indicate the total length and the benefits for the users.
