

6000L WOODEN FITNESS TRAIL 16 STEPS

Gymnastic trail realized in northern lamellar pine wood impregnated in autoclave with non-toxic salts section 90 x 90 mm thickness with rounded corners. All the wood is guaranteed 10 years. All the horizontal bars are in painted steel for outsides. This considerably reduces the danger that wooden splinters come into contact with the hands. The trail is divided into 16 steps, 8 of them with tools. The cartels printed on aluminium, have indications according to the degree of preparation of the users. This subdivision allows the amusement and the utilisation from people also not trained or a training for sportings. Each cartel, dimensions 200x400 mm, includes the explanation of the exercise (with an easily understandable image and especially that allows the use to people of any country), the number (following progressively the course, all the muscles of the body manage to be trained in gradual way) and the advice for sporting or not (all the times it is advised to repeat the exercise). Furthermore it's possible to insert short writings and personalised logos. A wooden bulletin board with a "personalised" cartel let better explain the fitness course and indicate the total length and the benefits for the users.
