

8600 SPRINGER BEES

Age of use: 0-12 years

Length: 157,20 cm

Width: 123,00 cm

Height: 83,50 cm

Spring game made of wood of Robinia, chestnut, oak and larch with panel of junction in marine multi-layer of Okumé.

Accessories such as knobs for hands are made of stainless steel.

Polyethylene is dealt against UV and presents solidity to the light on wool scale 1 to 8, with value 8.

Spring (20 mm wire) is tested and certified and is anchored to the extremities through the SPRING DISK system.

The stirrup of anchorage in stainless steel fixed to the spring-disk, guarantees the perfect union and handling between spring group and the shape of the game.

The support of fixing to land is given by a robust frame in steel subsequently zincified to heat as a guarantee of a strong resistance against the corrosion, digged in and fixed to the spring-disk guarantees the anchorage of the whole game to the ground.

The hardware used for the assembly of the spring game is in stainless and zinced steel.

SPARES: all the components of the game are available as spare parts. Possible damaged components must be substituted only with original parts of replacement.

INSTALLATION: keep to the illustration attached to the game.

MAINTENANCE: There is advised to carry out controls of maintenance as provided at the EN 1176-7.

Spring game designed and realized following the European Standard EN1176-1, 6 2008.
