

PAV 001 SHOCKPROOF FLOORING IN TILES

Tile cm 50x100 (available also 50x50 or 100x100 - thickness cm 2 - 3 - 4 - 6 - 8 - black, red or green)

Shockproof flooring manufactured with recycled rubber of out of order tires, selected granulometry, agglomerated with polyurethaned resins and with the addition of pigments for the amalgam colouring. Perfect drainage.

Surface of the plate with rounded corners. Shaped cap for lightening of the structure. Certification conforming to the European Standard EN 1177.

Lateral descents: to solve stumble problems are available descents on one side and with closed corners (available in the above-mentioned colourings - see photo)
